

New Item Types

Match each process in Project Stakeholder Management with its associated Process Group. (Drag the correct process to the process group. Note all process groups will not be used.)

Process

Identify Stakeholders

Monitor Engagement

Manage Engagement

Plan Engagement

Control Stakeholders

Process Group

Planning

Executing

Monitoring & Controlling

Initiating

Drag and drop questions

For questions on definitions and process order, the PMP may include items that leverage a drag and drop question. In the example on the left, candidates will drag the process to match up to its respective process group.

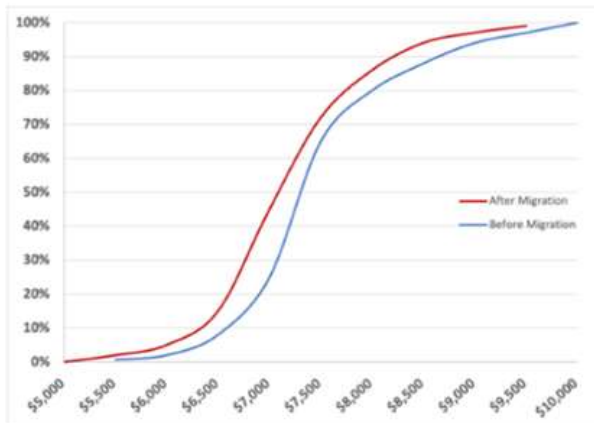

PROTOTYPE

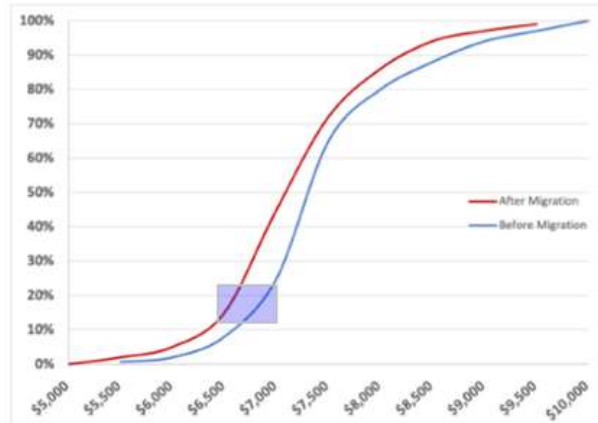

New Item Types

Click the area where the cost will increase the most.

Before clicking an area

After clicking an area

Hot area questions

This next prototype is called a hot area question. Candidates will be asked to interact with a digital graphic by clicking the area that corresponds with specific data points on the graphic.

PROTOTYPE

New Item Types

Scenario about risk describing a specific issue.

Based on the current risk register and the scenario described, which entry should the project manager edit? (enter the correct ID number in the text box).

Risk register:						
ID	Description	Likelihood of risk occurring	Impact if risk occurs	Severity	Owner	Mitigation Strategy
1	Something is ill defined	Medium	High	High
2	Project design incomplete	Low	High	High
3	Project schedule misunderstood	Low	Medium	Medium
4
5

PROTOTYPE

Fill in the blank questions

This next prototype is called a fill in the blank question.

Candidates will be asked to review some information. After reviewing the information, the candidate will type in the corresponding answer. Sometimes the information will be presented in a paragraph, other times in a table.

Drag and drop, hot area, and fill in the blank questions will be available for PMP exams delivered via computer, both at test centers and via online proctoring.
